

## PROJECT TOOLS

# Fire-resistant glass enquiry checklist

Send these details with your drawings to help us identify the right product, system and technical documents.

| Information         | What to provide                                                                                                                   |
|---------------------|-----------------------------------------------------------------------------------------------------------------------------------|
| 1 / Project         | Country or city, project stage and your company / role.                                                                           |
| 2 / Application     | Door vision panel, partition, window, facade, skylight or other use; interior or exterior.                                        |
| 3 / Performance     | Required classification and duration, applicable standard and project specification; add acoustic or impact needs where relevant. |
| 4 / Size & quantity | Width x height, number of panels and any nominated thickness. State whether sizes refer to glass or openings.                     |
| 5 / System details  | Door / frame material and sections, leaf thickness, glazing depth, beads, seals and fixing details. Attach drawings.              |
| 6 / Supply scope    | Glass only, support for your existing system, or a complete MINGAN assembly.                                                      |
| 7 / Programme       | Evaluation, testing, submission, purchasing and delivery dates where known.                                                       |
| 8 / Documents       | Existing specifications, report references, drawings and questions you need us to address.                                        |

If an item is not yet defined, mark it "to be confirmed". Please avoid choosing a product from thickness or a fire-rating label alone; the complete assembly and relevant test evidence determine suitability.
